

Indoor Humidity Gauge Thermometer

INSTALLING BATTERIES

Your thermometer requires two AAA batteries (not supplied) for power. For the best performance and longest life, we recommend RadioShack alkaline batteries.

Cautions:

- Use only fresh batteries of the required size and recommended type.
- Do not mix old and new batteries, different types of batteries (standard, alkaline, or rechargeable), or rechargeable batteries of different capacities.

Follow these steps to install batteries.

1. Slide off the mounting plate and battery cover.
2. Insert batteries according to the polarity symbols (+ and -).
3. Replace the cover and mounting plate.

When the display dims or the thermometer stops operating properly, replace the batteries.

Warning: Dispose of old batteries promptly and properly. Do not burn or bury them.

SETTING TO FAHRENHEIT OR CELSIUS

To display the temperature in Fahrenheit, slide open the battery compartment cover and set °C/F to °F. To display the temperature in Celsius, set °C/F to °C.

MOUNTING THE THERMOMETER

You can use the adhesive tape on the back of the mounting bracket, or screws (not supplied), to mount the thermometer on the wall. Or you can use the built-in stand to set it on a flat surface.

Using the Adhesive Tape

- Remove the tape's backing
- Press the mounting plate against a wall
- Slide the thermometer into the plate

Using Screws

- Drive two screws into the wall through the mounting plate
- Slide the thermometer into the plate

Using the Stand

- Remove the mounting plate
- Lift the stand
- Set the thermometer on a flat surface
